

**PRP** therapy  
D R A C U L A

**PLATELET RICH PLASMA**

# Dracula therapy

---

**SKIN REJUVENATION USING  
YOUR OWN PLASMA**

For over thirty years, PRP has been used in many different medical fields including: **cardiac surgery, oral surgery, dentistry and periodontal implants, orthopedics, wounds care, sports medicine, neurosurgery, general surgery and cosmetics.**

Platelet rich plasma (PRP) obtained from your blood contains platelets which work in the body to clog up cuts and tears. Platelets also have growth factors on the surface which stimulate collagen production when injected into the skin.

## HOW DOES IT WORK?

---

A small amount of blood is drawn from the patient into a sterile tube in the exact same manner as a standard blood sample. The tube containing a patient's blood is placed into a centrifuge and spun to separate the plasma and platelets from the other blood components.

After a few minutes, the plasma and concentrated platelets are removed from the same tube and re-introduced into the patient at the site of the injury, scars, skin, obvious lines or wrinkles. Using a small sterile needle, your physician will inject the PRP in and around the desire site.

This is an all accomplished 100 % natural procedure, without using animal products derivative or any other foreign material.

Research and clinical data show PRP obtained from the patient's own blood is safe, with very minimal risk of adverse reactions or complications. Because the platelets are produced from your own blood, there is no risk of rejection or disease transmission.

---

## Which Facial and body areas can be treated?

- Crinkling skin around and under the eyes
- Cheeks and whole face
- Neck
- Jaw line
- Chest and décolletage
- Back of hands and arms
- Any other body areas
- Stimulate hair growth on scalp.

---

## How long does a treatment take?

30 - 45 minutes.

---

## How many treatments and how often is this therapy needed?

While responses to treatment vary, most people will require 1-3 sessions. Each set of treatments is spaced approximately 4-6 weeks apart. There is no limit to the number of treatments you can have. Your clinician will determine your treatment protocol according to your skin condition.

---

## What results can I expect From PRP treatments?

Improvement of skin texture and tone are noticeable within three weeks. Full collagen regeneration takes up to three months.

---

## Can any skin type or color have PRP treatment?

Yes, PRP treatments can be used on all skin types and colours.

---

## Are results immediate?

No. Swelling from the fluid is what you will see and feel first. Over the days/ weeks the platelets will release the growth factors and pre stem cells which will assist in more collagen growth.

---

## How long do results last?

Treatment results vary, however, in most patients the results last up to 18 months. Touch-up treatments will maintain the results.

## For medical and aesthetic use

- Face or neck Lifting
- Face Peelings
- Non healed wounds
- Skin grafting
- Nerve reconstruction
- Fat grafting
- Cutaneous biostimulation
- Fat autografting
- Anti-Aging treatment
- Fillings
- Post-Peelings and post laser

## Possible side effects of PRP Facial rejuvenation

Minimal swelling, bruising and redness for 12-24 hours. Some little bruise at the needle site may be visible for 2-3 days.

<b>EASY</b>	Just taking some blood from the patient and put it in a centrifuge
<b>SAFE</b>	<ul style="list-style-type: none"> <li>• No risk of infection (antimicrobiocidal)</li> <li>• No risk of granuloma, bumps, lumps</li> <li>• No risk of asymmetry</li> <li>• No risk of allergy</li> </ul>
<b>NATURAL</b>	Patient's own plasma
<b>CHEAP</b>	Compare to other treatment options and possible to treat more places
<b>VERSATILE</b>	<ul style="list-style-type: none"> <li>• Can be injected deep and/or superficially</li> <li>• Mesotherapy or Derma roller</li> <li>• Mixed or not with dermal filler, vitamins, amino acids, anti-oxidants</li> <li>• As a stand-alone treatment or post ablative laser</li> <li>• Can be used everywhere on the body, hair loss, after eye laser surgery, face, neck, décolleté, knees, elbows, stretch marks, wounds and scars, tendons and ligaments.</li> </ul>
